## Embed Video and Audio to Your Site

Our Pro elements are not the only way to add Video and Audio to your site. You can add multimedia content from [Vimeo.com](https://www.vimeo.com), [Blip.tv](https://www.blip.tv), [Ustream.com](https://www.ustream.com) (and many other providers) using our Embed Code element.

Then get the embed code for whatever you're looking to add to the site. This can usually be accessed via an embed or share button found on or near the content you're looking to share.

Here we see an example of embeddable code connected to a video that is hosted on [Vimeo.com](https://www.vimeo.com).

**Embed** – Hide options

```
<iframe src="http://player.vimeo.com/video/15069551" width="700" height="393" frameborder="0" webkitAllowFullScreen mozallowfullscreen allowFullScreen></iframe> <p><a href="http://vimeo.com/15069551">The Unseen Sea</a> from <a href="http://vimeo.com/user1857500">Simon Christen</a> on <a href="http://vimeo.com">Vimeo</a>.</p>
```

Size:  x  pixels

Color:  or

Intro:  Portrait  Title  Byline  Staff Picks Badge

Special stuff:

- Autoplay this video.
- Loop this video.
- Show text link underneath this video.
- Show video description below video.

[Use old embed code](#)

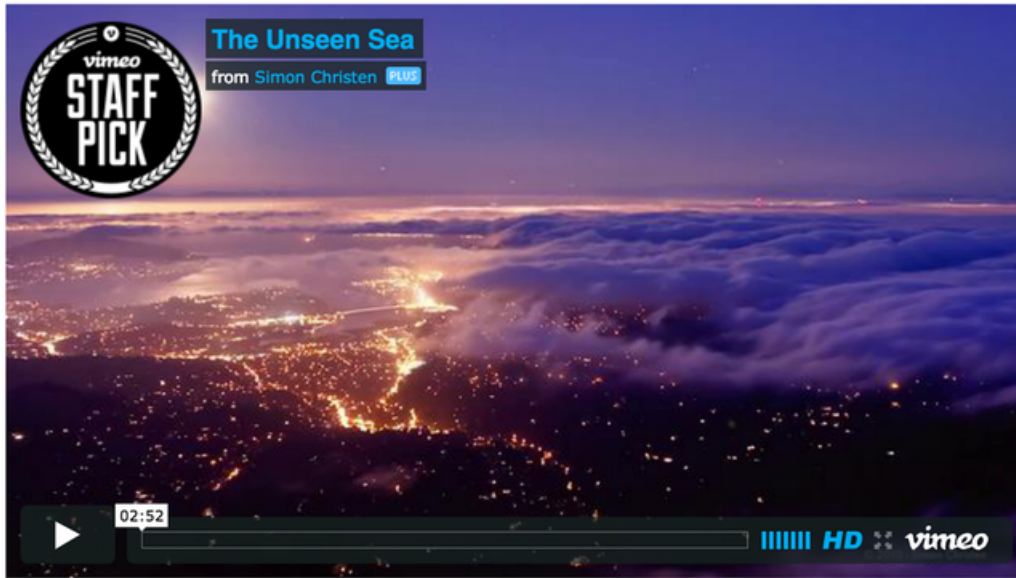

Once you have the embed code, click inside the Embed Code element to paste it in place.

```
<iframe src="http://player.vimeo.com/video/15069551" width="700" height="393" frameborder="0" webkitAllowFullScreen mozallowfullscreen allowFullScreen></iframe> <p><a href="http://vimeo.com/15069551">The Unseen Sea</a> from <a href="http://vimeo.com/user1857500">Simon Christen</a> on <a href="http://vimeo.com">Vimeo</a>.</p>
```

**</> CUSTOM HTML** Custom HTML

[Edit Custom HTML](#)

When you click off of the element, your content should show up there. All done!

The Unseen Sea from Simon Christen on Vimeo.

Note that there are a few situations where the content you've embedded won't show up on your site until you Publish the changes. So if you don't see your video, form or what have you in the editor, try Publishing to see if it shows on the live site.

Here's how the above video (which shows off the beauty of the ever present San Francisco fog) looks on a Published site after it's been embedded.
